Isothermal container for multi-temperature transport of chilled and frozen products

- **It can simultaneously carry chilled, frozen and ambient temperature foodstuffs**, thanks to the use of its chilled and frozen eutectic plates and the isothermal separator.
- Particularly suitable for perishable foodstuffs inside cash & carry, during shopping activities and for last mile urban logistics operations.
- **68 liters of capacity.**
- Total respect for the cold chain at all stages of transport.
- Easily transportable thanks to its small size and light weight.
- Manufactured using the rotational moulding technology: mono-block container and door (free of sharp edges, joints and welds).
- **Fully recyclable** at the end of the operating life.

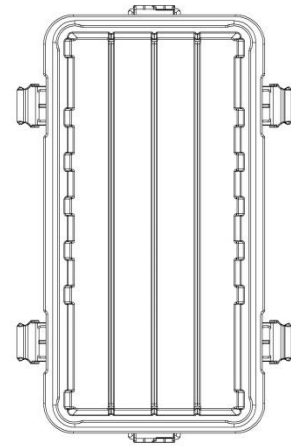

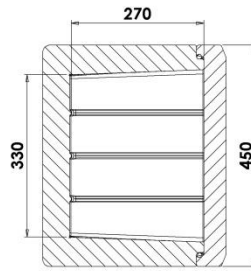

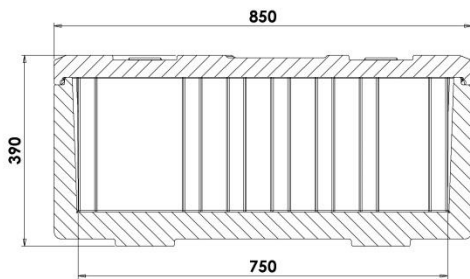

MANUFACTURING MATERIALS

Polyethylene	inner and outer walls of the container and the door; suitable for food contact	Polyurethane	insulating material between the walls of the container and the door, free of CFC and HCFC
Silicone	gasket	Nylon	wheels of the cart
Fibreglass reinforced polyamide	catches	POM - Acetal Resin -	cover-handle
Galvanised steel	trolley	Stainless steel	Grip handles

TECHNICAL CHARACTERISTICS

	CHILLED +3°C 180 WH	EXTRA CHILLED -12°C 155 WH	FROZEN -21°C 60 WH	EXTRA FROZEN -21°C 135 WH
